

1) Open the Lab Portal

riccifab.github.io/labportal.html

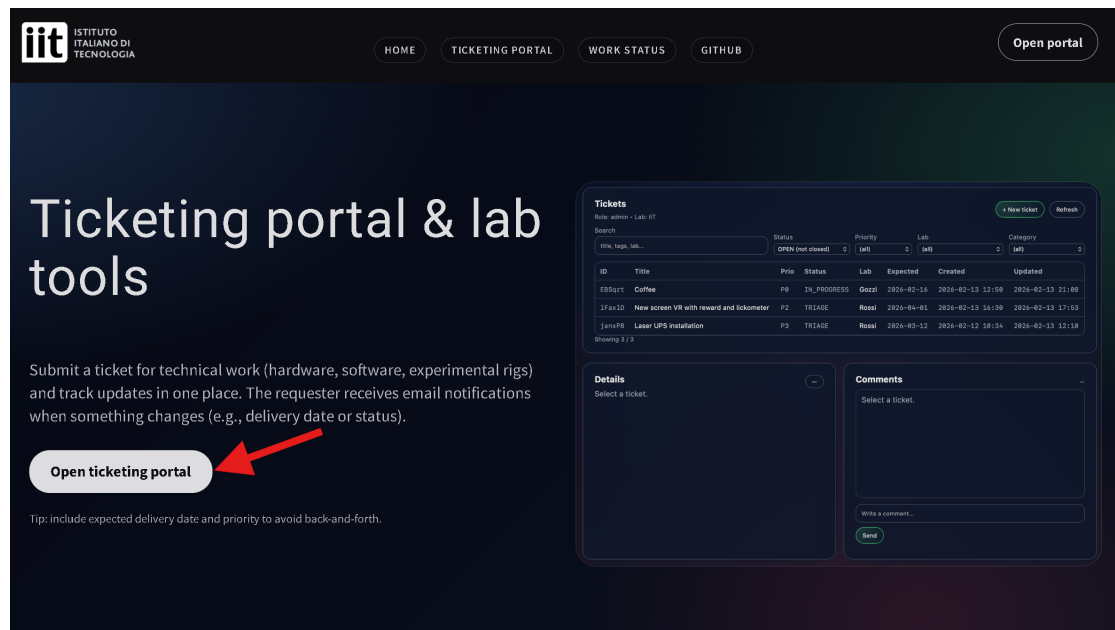

Figure 1: Lab Portal landing page.

- Open the Lab Portal link.
- If you need to create a ticket, click **Open ticketing portal**.

2) Login (IIT email)

riccifab.github.io/tickets.html

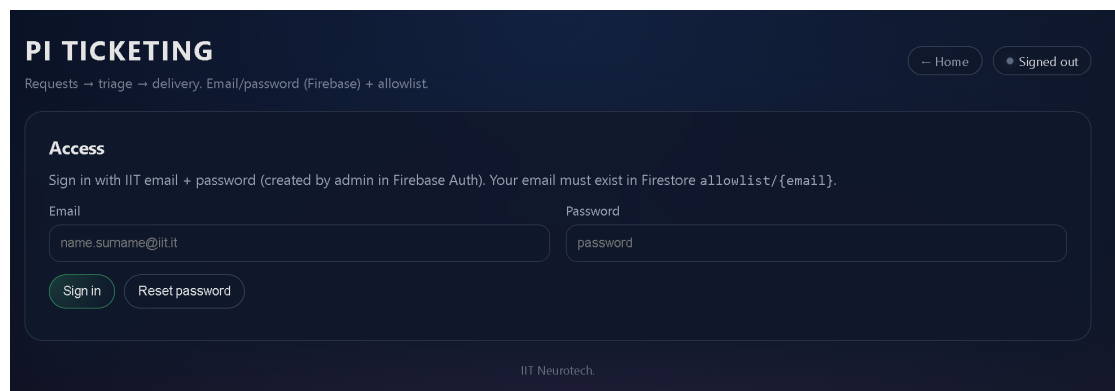

Figure 2: Login screen.

- Use your **IIT email** (e.g. `name.surname@iit.it`).
- **If your email is not in the system:** ping me and I will add you.
- **Default password:** `changethispassword`
- After the first login: **change your password** (do not keep the default one).

3) Create a ticket

PI TICKETING

Requests → triage → delivery. Email/password (Firebase) + allowlist.

New screen VR with reward and lickometer

Created by federico.rossi@iit.it • Category electronics • Lab Rossi

P2

APPROVED

Expected

2026-04-01

Hard deadline

no

Commercially available

unknown

Commercial link

-

Deferred

no

Why not deferred

skills • Requires knowledge of electronics, and implementation of designs already done by Fabio already

Impact / Effort

not_blocking • M

Tags

Screens, teensy

Description

Build 3 screens system driven by new Adafruits (Hunter's) boards, controlled by Teensy program to flicker screens at 16KHz. Add to

Figure 3: Ticket creation form.

- Click **New ticket** / **Create ticket**.
- Fill in the fields (see below).

4) What to write in the fields

The screenshot shows a 'New ticket' form with the following fields and their current values:

- Lab (group):** Iurilli / Rossi / Gozzi...
- Category:** electronics
- Priority:** P2 (normal)
- Expected delivery date:** dd ---- yyyy
- Title:** Short, concrete
- Description:** Context + what you need + constraints
- Definition of done (2-5 bullets):** - Works when... \n - Tested on... \n - Deliverable: file/part/commit
- Hard deadline?:** no
- Hard deadline date:** dd ---- yyyy
- Commercially available?:** unknown
- Commercial link (if yes):** https://...
- Estimated cost (EUR):** e.g. 250
- Procurement needed?:** unknown
- Can be deferred to someone in the lab?:** no
- If yes; to whom?:** Name / role
- If no: why not? (reason):** Requires specific skills
- If no: why not? (details):** One concrete line
- Impact:** not_blocking
- Effort guess:** M
- Tags (comma separated):** ttl, camera, pcb

A 'Create ticket' button is located at the bottom right of the form.

Figure 4: Ticket fields overview.

- **Lab (group)** and **Category**: your lab/group and the type of work (used for routing).
- **Priority**: P2 = standard, P1 = important, P0 = urgent only if it blocks experiments or there is a real deadline.
- **Expected delivery date**: “I would like it by” date (if known).
- **Title**: one concrete line = action + object + setup (e.g. “Fix camera trigger (VR)”).
- **Description**: context → what you need → constraints / links .
- **Definition of done**: verifiable bullets (works when..., tested on..., deliverable: file/part/commit).
- **Hard deadline?:** *Yes* only if it is truly non-negotiable; then also set **Hard deadline date**.
- **Commercially available?:** yes/no/unknown; if yes, paste the **Commercial link**.
- **Estimated cost** + **Procurement needed?:** rough cost estimate and whether purchasing is needed.
- **Impact** (blocking or not), **Effort guess** (S/M/L), and **Tags**: to assess impact/effort and make tickets searchable.

Rule of thumb: 1 ticket = 1 request. If you have 3 different things, open 3 tickets.
